CENTRAL INTELLIGENCE AGENCY

CONTRACTING OFFICER®S DEFENDINGS AND FINDINGS

AUTHORITY TO MEGOTIATE CONTRACT

The Central Intelligence Agency proposes to enter into a contract with Westinghouse Electric Corporation, Baltimere, Maryland, for certain radar equipment and related items necessary for support of field operations.

I hereby find that this procurement, Project EQUINE, is estimated to cost \$1,080,455.00, is chargeable to Fiscal Year 1956 funds, Appropriation No. 21x2190; and is for development of highly technical equipment essential to an experimental, developmental and research program presently under procurement and which will result in operational activities. I also find that this procurement is in the interest of national defense and that it has been certified by the Director of Central Intelligence under date of 29 July 1955, to be for objects of a confidential, extraordinary and emergency nature and therefore is within the purview of the prosurement authority of the Agency as stated in Section 10(b) of Public Law 110, flat Compress. Procurement by formal advertising of the work and services called for by the proposed centract, No. FL-3011, would result in public diselosury of the nature and character of the equipment as well as its intended use and would thereby jeopardise the security classification .footong sids lo

I hereby determine, as Contracting Officer for this centract, that the mescanity and authority for magetiation of this centract have been adequately documented by proper Agency authority, and that the proposed centract must necessarily be negatiated without formal advertising.
